

Properties of Materials

Can you be a detective for Mrs Janman and Mrs Gray and find objects at home or at school for each of the materials below? Please draw a quick picture of the object you find and label your picture. We would then like you to write the properties of the object / material... remember it will have more than one! At the end of the sheet there are some blank boxes. Can you think of any of your own materials and objects to put in? Please see the example below.

Material

Properties

<p>Wood</p> <p>Coffee table</p> 	<p>The coffee table is hard and rigid. It feels smooth. The wood looks shiny.</p>
<p>Metal</p>	
<p>Plastic</p>	
<p>Glass</p>
