

Leopards Homework Grid

Term 1

Can we always believe what we are told?

These are optional activities but we hope you try 1 or 2 this term.

Please bring in or practise for the **WC 17th October**

Move

With a family member at home teach some of the footwork we have been working on in PE and get them to mirror your movements. Take pictures or a little video to show you both mirroring each other's footwork.

Create

Draw and design your own Greek pot on paper. Think about activities the ancient Greeks used to do and add these to your pots.

Add colour and be able to discuss how your pot would help people to learn more about the ancient Greeks.

Observe and explore

Predict some sounds that you think you may hear around your home and community. Write these down, then visit these places and write down what you can hear at the locations. Compare if your predictions matched what you could hear. Were there any surprises?

Talk

We have spoken about the laws and different ways of life in ancient Greek city-states Athens and Sparta.

Talk to an adult and discuss if you think it would have been better to have grown up in Athens or in Sparta. Be ready to talk about the conversation and reasons why you prefer one city-state to the other.

Make

Thinking about our science topic sound, do you think there is a good material that could block out sound?

Investigate with different materials at home to discover which material blocks the sound better. Then try and create a pair of headphones using that material that you can share with the class.

Question

We have looked at a lot of different myths and discussed how these are not actually real events but created in ancient Greek times.

Can you write reasons why the ancient Greeks did believe in these myths and why they were so important to them?
